Spring cleanup

Spring is a much-welcomed season in Canada and it's also a busy season for cleaning up the property for summer. The hard surfaces around your house will have accumulated dirt and grime over the past year and one of the best tools to thoroughly clean them is a pressure washer. They are available in three different types: corded electric, battery powered and the less popular - gas. Cleaning power is measured by PSI (pounds per square inch) and GPM (gallons per minute). Generally, the higher the PSI and GPM, the more heavy duty the unit. It's a good idea to choose a model with adjustable pressure for the different surfaces you'll be cleaning. Pressure washers are available with accessories for cleaning large areas like the driveway, deck, fence, walkway and the walls of your home. Other nozzles can clean smaller jobs like gutters, outdoor furniture, barbecue grill, garbage cans and recycling bins. Surfaces with stubborn stains may require a soap solution with your pressure washer. Be sure to dress for the job and wear work clothes and closed toe shoes or rubber boots. Annually cleaning your property with a pressure washer may sound like a lot of work but it will make a big difference in how your property looks and lasts.

PROJECT OF THE MONTH: OUTDOOR PROJECTS

Canada's Building Centre

Build a wood fence

A wood privacy fence is not only a safety feature for your home, it also adds a natural and warm element to your landscaping. It is a DIY project that can be done over the span of a weekend depending on the size of your property. Things to consider when planning your fence are how much privacy you want, the slope of your yard, the style of your home and municipal restrictions. You should also inform your neighbours and establish your property line. TIMBER MART has the lumber, supplies and the expertise to help you design the ideal fence for your property. Our Project Experts will turn your vision into an accurate design plan, including a complete list of materials and cost estimate.

Build a deck

A backyard deck is a home improvement project that is fairly simple to build for the average DIYer. The scope of the build will depend on your budget and your DIY skills. Planning your deck to be built in phases over several seasons can help with the budget. Deciding between a wood deck or a composite wood deck will often come down to budget as well. A pressure treated wood deck is more economical than a cedar or composite deck. Composite decking, however, has the big advantage of hassle-free maintenance. Like any DIY project, thorough planning and preparation is a big part of a successful result. A well-designed and well-built deck is a worthy investment that will add value to your property. Visit TIMBER MART and get started at the right place. We have everything you need to build the ultimate deck, including high-quality building materials, expert advice and the right tools to get the job done.

Concrete landscaping

TIMBER MART has what you need for your landscaping ideas. From patios to paved walkways to fire pits, we have the top-quality concrete products to refine the landscaping around your home. Careful DIY planning and building of your project can give you the look of a professionally landscaped home but at a fraction of the cost. Well-designed landscaping features and outdoor living spaces can add beauty and character to your property as well as increase your property value. Check out our selection of concrete landscaping products on your next visit to TIMBER MART.

Build a seating wall

As the name suggests, this is a short wall that is designed at a height for seating. It also has a dual function as a decorative feature in your yard. A seating wall is most often found around a patio, pool, fireplace, firepit or any area where people gather. It's a great way to add built-in overflow seating when entertaining without having to provide more furniture. A seating wall can also be included into a retaining wall design. The seat height is usually 21 inches high including capstones but can vary depending on your needs.

PROJECT OF THE MONTH: OUTDOOR PROJECTS

Simpson Strong-Tie

Decorative wood connectors bring both design elegance and structural strength to your outdoor living areas. Hardware accommodates 4x and 6x lumber sizes.

Build a shed

Adding a shed will not only give you an ideal storage solution for all your garden tools and outdoor belongings, it can also be used as living space for a home office, yoga studio, playroom or a recreation area. Building it yourself enables you to fully customize the design for your needs and location. Sheds are fairly easy to build for an experienced DIY-er and often don't require building permits.

We have shed plans

Our shed plans are available in a variety of sizes and customizable designs. Click here to browse our shed plans at timbermart.ca. Have questions? Contact your local TIMBER MART for more information.

PROJECT OF THE MONTH: OUTDOOR PROJECTS

Update your house numbers

An easy DIY project that adds instant curb appeal to your home is updating your house numbers. Installing large, modern-font numbers is a stylish update that complements most architectural styles. Choose a colour and material that coordinates with the other finishes of your home's exterior. Be sure to position your house numbers in a well-lit area so they can be seen from the street by emergency vehicles, if necessary. Some house numbers have a backlight feature and are visible both day and night. Backlit house numbers can be hard wired or have a separate power adapter so no hard wiring is required.

Use your **TIMBER MART Project Card** and make it easy to offset the cost of your home improvement project.

NO INTEREST IF BALANCE PAID IN FULL WITH MINIMUM PAYMENTS OVER 3, 6 OR 12 MONTHS*

Speak with a sales associate at a participating **TIMBER MART** store for payment options available.

Click here to apply for financing instantly online or text **Timbermart** to **32471** (French 32472)

*On approved credit. An annual fee, as set out in your Account Agreement, may be charged to your account subject to certain conditions. Financing is provided by Fairstone Financial Inc. and is subject to all the terms and conditions in your Retail Credit Agreement, Disclosure Statement and the promotional plan disclosure statement (collectively the "Account Agreement"). Interest will accrue on the purchase amount and annual fees from the beginning of the promotional period, and minimum payments of 3% of the balance will be due each billing cycle. However, if you make the required minimum payments and pay the balance in full by the promotional period expiration date, all accrued interest will be waived and not charged on the purchase amount and annual fees. If you do not pay the balance in full by the promotional period expiration date, all accrued interest will be charged at the annual interest rate of 31.99% as shown in your Account Agreement.

This offer cannot be used for previous purchases and cannot be combined with any other offers, promotions or special incentive programs. Certain terms and conditions apply. See Account Agreement or call Fairstone at 1-800-995-2274 for further details. At participating TIMBER MART locations only. Offer available on any purchase of \$299 or more (including taxes) when you use your TIMBER MART project card.

Refresh with high heat paint

Metal surfaces that get hot require specialty paint that can endure high temperatures. Rust-Oleum's SPECIALTY High Heat Enamel is a premium, fast-drying formula with superior durability and colour retention for indoor and outdoor high-heat application. The rich, satin finish resists heat up to 650°C (1200°F) and protects against rust and corrosion. Use on grills, wood-burning stoves, radiators, engines and other metal items.

How to wash a deck

Washing a wood or composite deck is a job that should be done at least once a year to keep it well maintained and looking great. It's best to wash either type of deck in the morning or late afternoon to avoid the afternoon sun which can cause cleaners to evaporate before they can be rinsed. For both types of decking, start by clearing everything off the deck and cover any nearby plants that could get damaged. Sweep the entire deck with a stiff broom to remove leaves, debris and the build up of dirt.

Composite Composite decking has fewer maintenance requirements so the job will be much simpler and faster. The easiest way is to use a power washer, on a low setting, in the direction of the grain, then against the grain. The force of the power washer should remove most dirt. For tougher areas, use a mild liquid detergent or specific composite deck cleaner and rinse with clear water when done. Alternatively, you can use a deck brush with liquid detergent or cleaner and again, scrub in the direction of the grain, then against the grain. You may have to scrub twice in tough areas. Then do a

final rinse with a high pressure hose and clear water. If your deck is large, you may have to clean and rinse in sections so that the cleaner doesn't dry.

Wood How dirty your wood deck is will determine how you will begin to wash it. For a very dirty deck, start with a deck cleaner and follow the manufacturer directions, then rinse with a high pressure hose or a pressure washer on low setting. Be very careful not to damage the wood surface with the pressure washer. A damaged surface will appear fuzzy and will require an extra step of sanding. For decks that don't have a lot of dirt, scrub the deck with a deck brush and mild liquid detergent, then rinse with a high pressure hose. While the deck is still wet from washing, use a wood brightener and follow the manufacturer's directions. The wood brightener brings out the wood's natural beauty and provides a better surface to accept the final stain or sealer. Thoroughly rinse off the wood brightener with a high pressure hose. When the deck is completely dry, finish the job by applying a wood stain or sealer.

Bring the outdoors indoors

Sunroom Solutions provides customized and affordable 3-season windows for any outdoor structure. This window system offers the flexibility to easily convert your space into an inviting outdoor enclosure, extending your enjoyment of the outdoor season. Vinyl pane windows protect you from environmental elements like wind, rain, snow, insects, and allergens! These durable windows are constructed with strong powder-coated aluminum frames and feature durable weather-resistant 10 mil vinyl panes. Sliding window panels are spring-loaded and can be easily removed to achieve a 100% screen opening. This product is designed for the DIY-er with an easy and inexpensive installation process. Enclosing an outdoor space adds value to your home or cottage by increasing the square footage and creating an ideal living space for you to enjoy. Come in and talk to a TIMBER MART Deck Specialist about the benefits of a Sunroom Solutions 3-season sunroom.

Click here to see how this vinyl window system easily transforms any outdoor space into your favourite 3-season retreat!

GE Supreme Silicone Window & Door Sealant

GE Supreme Silicone Window & Door Sealant is 100% waterproof and provides a reliable seal in exterior weather-prone areas such as windows, doors, basements, roofs, sidewalks, siding, tuckpointing, and attics. The 30-minute rain-ready formula resists stain-causing mould and mildew growth and resists UV degradation. It's made from 100% silicone and offers 40% more flexibility than Class 25 sealants. Plus, it offers 50% joint-movement capabilities without cracking, shrinking, breaking down or washing away. GE Supreme Silicone Window & Door Sealant has a low odour that makes it also ideal for interior applications, and it won't discolour most high-end metal finishes such as chrome, bronze, and nickel.
